BACHELOR OF COMPUTER AND INFORMATION SCIENCE

LinkedIn: www.linkedin.com/in/muawiyah-suleman-b50828300

Portfolio: www.muawiyahsuleman.github.io

SUMMARY

Final-year Bachelor of Computer and Information Science student (Distinction) with hands-on experience across ASP.NET Core, Kotlin/Android, and SQL Server, gained through university projects including a team-built fuel management platform, a containerised logistics system with CI/CD, and a claims management system with role-based authentication. Previously worked as a contract Business Analyst at Metal Management Solutions, translating business requirements into functional system insights. Currently combine full-time study with part-time fabrication and welding work at LS Fabrications, including MIG welding and supporting the business's local marketing — experience that's sharpened my attention to detail and reliability under real deadlines. Looking to bring that combination of technical skill and work ethic into a junior developer role.

EXPERIENCE

Metal Management Solutions (MMS)

Business Analyst (Contract)

Durban, South Africa

November 2024 – March 2025

- Analyzed business processes and system workflows using the WIRE platform; used Excel to manage and interpret business data for reporting and decision-making.
- Collaborated with the team to identify system improvements and translate business requirements into functional system insights.

LS Fabrications (Part-Time, alongside studies)

Welder/Fabricator Assistant

Durban, South Africa

May 2025 – Present

- Performed MIG welding and precision fabrication work to technical drawings and safety standards.
- Assisted with setting up and managing the business's Google Business Profile, supporting local marketing and customer visibility.

EDUCATION

Varsity College (IIE)

Bachelor of Computer and Information Science (With Distinction)

Durban, South Africa

2024 – 2026

Samson's Welding School

MIG Welding Certification

Durban, South Africa

Feb 2025 – Apr 2025

Grosvenor Boys' High School

National Senior Certificate (Bachelor Pass)

Durban, South Africa

2018 – 2022

PROJECTS

(Selected projects — view full portfolio on GitHub)

TopemUp Fuel Management System | In Progress — Team Project (MNM Solutions)

- Contributing to a 3-person team building a Kotlin/Jetpack Compose Android app, ASP.NET Core Web API, and ASP.NET Core MVC dashboard backed by SQL Server.
- Helped define the SRS, including role-based access control, JWT authentication, and audit logging; building the driver-side mobile workflow.

Global Logistics Management System (GLMS)

- Built with ASP.NET Core MVC (.NET 8), SQL Server/EF Core, and Firebase Authentication with role claims.
- Containerised with Docker Compose and automated testing/deployment via GitHub Actions; wrote xUnit/Moq tests.

Smart-X IoT Mesh Ecosystem

- Designed a separate ASP.NET Core Web API and MVC frontend for a simulated IoT telemetry gateway.
- Implemented sensor registration with file upload and role-gated site access; maintained 25+ incremental Git commits.

SKILLS & INTERESTS

Programming Languages: Java, C#, Kotlin and SQL

Version Control: Git, GitHub

Design/UX: Wireframing, UI/UX principles

Web Development: HTML, JavaScript, CSS, ASP.NET MVC, Elementor

Cloud Platforms: Microsoft Azure, Firebase

Methodologies: Agile, SDLC, and Data Analytics

Certifications: MIG Welding (Samson's Welding School)

Language: English (Fluent)

Interests: Technology, Software Development, 4x4 Off-Roading, Camping, Fishing, Welding/Fabricating
